MASTERING SOFTWARE DEVELOPMENT AND DELIVERY IN THE FINANCE INDUSTRY

CloudBees Customers Share Software Delivery Success Stories

Allianz (ii) BNP PARIBAS CORPORATE & INSTITUTIONAL BANKING Broadridge® Capital One™ DZ BANK

ICE Mortgage Technology™ One network. Every connection. Every mortgage.™ HSBC LendingClub Nationwide Building Society THE HARTFORD

A Letter from the Co-founder

Hello and welcome!

Financial organizations have no alternative but to adapt through rapid, continuous software innovation or they will become extinct or overtaken by more nimble, tech-savvy industry mavericks. This is textbook Darwinism. In this new reality, software delivery becomes a critical business process.
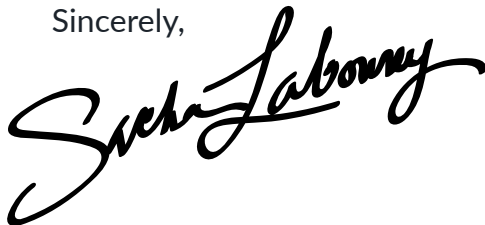

IT teams within financial organizations face huge hurdles: they need to rapidly innovate, modernize legacy systems and adhere to governance and security regulations. But much like in any system, you can't go faster unless you remove friction. To tackle these issues, our customers automate their software development and delivery so that their developers can focus on innovation and customer value instead of wasting time managing the process and infrastructure. At CloudBees®, we help financial organizations accelerate time to market, increase quality, maintain compliance, prepare for audits and protect against cybersecurity vulnerabilities.

Innovation can only take place if you free up developers to do what they do best - code. The ability to attract and retain top-notch engineering talent is essential, especially in such a competitive market. And the best developers will join the companies that provide them with the best tools and processes so they can do their job in the best conditions.

The spirit of DevOps is about sharing and collaboration. It is with this in mind that CloudBees has created this collection of success stories to show how IT transformations happen within financial services, and the business results achieved with the help of CloudBees solutions.

I hope you enjoy this eBook! I look forward to discussing how we can help you tackle DevOps challenges too at a future event or Meetup. Onward.

Sincerely,

Sacha Labourey
Chief Strategy Officer and Co-founder
CloudBees

Allianz "Insures" Accelerated Software Delivery Processes with Continuous Delivery

Allianz ⑪

Summary

Allianz brings state of the art insurance and service offerings to customers faster with CI/CD and CloudBees

Challenge

Respond to changes in the insurance market faster by shortening software delivery schedules

Solution

Standardize on CI and CD with CloudBees to minimize project startup times, automate development and testing tasks and complete large, complex projects faster

"CloudBees has helped our developers demonstrate to their colleagues in operations that what they are delivering is reliable and that it will work the first time...That has produced a level of trust on operations side of development teams that are using CloudBees for CI and CD."

Adam Rates
Head of Strategy and Architecture
Allianz

Results

Staffing flexibility and scalability improved

Project times cut from days to hours

Reliable development and build environment established

DZ BANK

> " I truly believe that now we actually do know what we are doing, that we are able to customize the least possible things, that we can actually stick with the most standardized way that there is in the market and that we are able to adjust to all new situations that may arise in the future. "

Dr. Julius von Rosen
Head of Electronic Trading Platforms
DZ Bank AG

Dr. Julius von Rosen

Dr. Julius von Rosen, Head of Electronic Trading Platforms at DZ Bank AG, discusses how the company is enabling developers to automatically deploy to a production-like environment in their test universe faster.

Fast, Secure Software Delivery Keeps ICE Mortgage Technology on Top of the Mortgage Processing Industry

BNP PARIBAS
CORPORATE & INSTITUTIONAL BANKING

Summary

To thrive in a highly competitive and regulated global banking market, BNP Paribas CIB built a high quality, stable and secure software development platform using CloudBees

Challenge

Create a high-productivity DevOps platform to accelerate delivery of innovative and secure banking applications

Solution

Adopted CloudBees to support CI and CD process automation, improve security and lay the groundwork for moving to the cloud

"We are deploying products seven to 10 times faster. Some deployments that took hours are now taking minutes."

Riad Ghafir
Global Head of Production Factories
BNP Paribas CIB

Results

Deployments seven to
10
times faster

More scalable platform for managing over
800
projects

Greater
stability
stability and security for highly regulated banking sector

Improved ability of dev teams to
innovate,
improving their work experience

Fast, Secure Software Delivery Keeps ICE Mortgage Technology on Top of the Mortgage Processing Industry

ICE Mortgage Technology™ | One network.
Every connection.
Every mortgage.™

Summary

ICE Mortgage Technology improves efficiency of software development operations by 20% and strengthens security with CI/CD practices powered by CloudBees

Challenge

Reduce downtime, improve security and accelerate time to market with CloudBees

Solution

Adopted CloudBees to support implementation of CI and CD process automation and manage pipelines as code

"Ultimately we want no human intervention in the whole build-to-deploy process. We want to be 100 percent CI/CD and zero-downtime deployments for all our product lines. CloudBees will help us reach that goal."

Satheesh Ravala
Senior Vice President of
Cloud Engineering and Operations
ICE Mortgage Technology

Results

Increased developer efficiency by
20%

Improved access, control and
security

Gained
valuable insight
into pipeline activities

Improved ability to
recruit developers
